

ABOUT US

Temp Power Systems is an electrical contractor providing temporary power poles and generator rentals. We aim to be the best in service while maintaining competitive prices.

Temp Power Systems has been providing the construction industry with Personal Quality Service for half a century. We are proud to be serving hundreds of General Contractors, Home Builders and Electricians in Southern California.

We service all Southern California counties including Orange County, Los Angeles, Riverside, San Diego, San Bernardino, and Ventura. With several jobs in each region and a work force in the surrounding areas, we're always able to service you in a timely fashion to meet your deadlines.

As a result of our dedication to excellence, we train and equip our staff to excel in their craft and deliver exceptional service so that your job is powered to success. We have a strong work force of certified electricians, which include several U.S. Veterans.

Our Services Include:

- *Power Generation*
- *Power Distribution*
- *Temperature Control*
- *Emergency Services*
- *Project Management*
- *Temporary Shelters*
- *Phone Installations*
- *Line Diagrams*
- *Permit & Inspection Management*
