

WHY CHOOSE TEMP POWER SYSTEMS?

Choosing a temporary power provider can be a challenge in that there are many types of contractors who do a variety of work.

Temp Power Systems is a full service residential, commercial, and industrial electrical contractor specializing in temporary power service. We can help you with the design and power requirements. Your project is as important to us as it is you. Our business has been built on referrals, and it is our goal to make sure you are going to want to tell others to utilize our services.

Temp Power Systems is committed to:

- Delivering service within the project's time frame and budget;
- Providing consistent industry standard work quality;
- Ensuring all contracted customers and prospective customers are treated fairly and courteously;
- Ensuring customer satisfaction by keeping the customer informed on project status;

Qualifications

We have a strong work force of certified electricians, which include several U.S. Veterans.

Affiliations

Temp Power Systems is a proud member of the Associated Builders and Contractors of Southern California.
